Annex A:

Procurement of Medical Equipment (Defibrillator Machine)

PR# TF 24-05-028(Q)

*ABC: **P4,800,000.00***

1. 4 unit DEFIBRILATOR MACHINE

Specification:

Configuration: AED + SPO2 + NIBB

(Non-invasive blood pressure monitoring)

**7 inch diagonal LCD TFT color screen*

**Display Resolution of 800 x 480 pixels (VGA)*

**Weight 5.66kg w/o battery*

**3 waveforms display*

**With ready for use indicator to confirm that the device has passed its hourly, daily, and weekly automated self-test.*

**With patient category button to quickly allow clinicians to switch between patient categories.*

**With smart select knob easy menu navigation*

**With mark event button to insert time-stamp annotations on event summary*

**Sync button should light up when in use*

BATTERY:

Lithium – ion

at least 2.5hrs monitoring on full battery

at least 100 full energy charge/shock cycles on a full battery

EXTERNAL PADDLES:

External adult paddles w/ removable adaptors to reveal pediatric paddles

Has patient contact indicator located in the paddle that lights up to signify good contact with skin

With remote charge and shock buttons present on the paddles

PADS:

Can use multi-function disposable pads for cardioversion, monitoring, EAD or pacing.

Single pad set for both adult and infant/child patients

Has patient contact indicator onscreen to signify good contact with skin.

Built in 50mm thermal printer

Can be configured to automatically print when charging shocking alarm events or making events

Code summary can be printed after therapy with real time stamps,

With patient vital signs trending up to 8 hrs.

With summary of the hourly, daily and weekly automatic self test that are viewable onscreen

Can store 50 events summaries

With USB port to download event summary

Operational specifications:

1. MONITOR

**can perform 3 to 5 lead ECG monitoring, with leads of sensing*

**capable of NIBP Monitoring (included)*

**capable of SPE2 monitoring (included)*

**capable of CO2 monitoring using mainstream or sidestream capnography*

2. MANUAL DEFIBRILLATION:

**uses low energy biphasic truncated exponential waveform technology with impedance compensation.*

**energy selection up to 200 joules maximum via rotating knob*

**less than 5 secs charging time to recommend adult dose of 150J with a new fully-charged battery*

**Capable of synchronized cardioversion.*

3. AED mode

**AED mode with voice prompts and CPR coaching*

**With configurable CPR timer that is automatically activated after shock delivery*

**AED Energy Profile: 150 Joules non-escalating for adult/50J for Infant/Child nominal into a 50 ohm test load*

****Nothing Follows****
